Personal Profile

An adaptable, creative, artistic and friendly individual interested in game development in both programming and artistic ways. A second-year student looking to take my placement year with your company and acquire industry experience before finishing my degree.

Skills

- Programming – C++, C#, Python, HTML
- Unreal Engine 4/5
- Unity
- Photoshop
- JetBrains software
- Adobe Suite
- Teamwork
- Graphic Design
- Communication

Education

University of the West of England | 2021 – Present

2021-Present

Current Modules:

More Games in C++ (Modern C++ & SFML)

Game Engine Architecture (Unreal Engine 5 & Unity)

Play and Games (Essay writing and Board game creating group project)

Game Level Design (Unreal Engine 5)

Completed Modules:

Achieved with average marks higher than 80%

Games in C++ (Modern C++ & SFML)

Game Development Evolution (Group mobile game design & Game Design Theory)

Games Tech 101 (Python & Group game creation)

Principles of 3D Environments (Maya & Unity)

During my first year, I worked on two group projects in which communication and an organised workflow were critical during game implementation and game design.

E.E.B Feliciano Pires – Brazil

- Maths
- English (Second language)
- Art
- History
- Portuguese
- Geography
- Chemistry
- Geography
- Physics

All of these subjects were passed at grade 8.5. This is equivalent to GSCE at grade 4/C or above with the exception of English as this is taken as a second language.

Employment History

Internship Game Developer at NHS | July 2022 – September 2022

I worked 5 days a week remotely for NHS - Dorothy House, making a VR application for VR headsets and Mobile / Tables, in which through a website they could upload 360 videos and keep track of patient's feedback on using the application and the content.

- Unity
- C#

Digital Marketing Assistant at Purpol Marketing | July 2021 – January 2022

Working as a Marketing assistant helped me improve my communication and research skills

Team Member at KFC Bath | January 2020 – October 2020

As a fast-paced job, it taught me how to deal with pressure and teamwork, and I was later offered the position of Team Leader because of my dedication and ability to support others.

Hobbies & Interests

- Gaming – I play a variety of games, Cyberpunk 2077 is my favourite, especially because of the art and the cyberpunk theme. Decision / Story-driven games are the ones I enjoy most.
- Languages – I love learning new words in different languages or even learning a whole new language. The feeling of being able to understand someone in another country feels amazing.
- Technology – I enjoy watching technology videos, my most watched topics are the process they go through to create a game, AI-Generated images, Genetic algorithms, and digital art tips.
- Music – I absolutely love music, my favourite genres are rock and techno. I also love playing musical instruments.
